Vinisha Sisodia

Unionville, CT 06085 | 631-747-4133 | vsisodia3@gatech.edu | linkedin.com/in/vinisha-sisodia | U.S. Citizen

Education

Georgia Institute of Technology | Atlanta, GA *August 2026 – Present*
Bachelor of Science in Electrical Engineering, GPA 4.0 (in progress) Expected Graduation, December 2028
Current Coursework: CS 1301 Introduction to Computing (Python), PHYS 2211 Introductory Physics I, CHEM 1310 General Chemistry with Lab, ECE 1100 Introduction to ECE

Skills

Electrical Design: Circuit Design and Analysis, PCB Design, Schematic Capture, Sensors and Signal Conditioning, PWM and MOSFET Drivers, Microcontrollers (ESP32), CAN Bus, Power Distribution Wiring
Test and Lab: Multimeter, Oscilloscope, Soldering, Crimping, Hardware Troubleshooting, Device Characterization, Cleanroom Fabrication
Software: Altium Designer, SolidWorks, Onshape, AutoCAD (basic), Microsoft Excel, Word, PowerPoint, QuickBooks
Programming: Python, C++, Java
Languages: Hindi (native), Spanish (fluent), English (fluent)

Experience

Glocon Industries | Engineering Intern *May – August 2025*
- Translated 75+ customer specifications into fan-performance data using Excel, reducing rework from spec mismatches.
- Assisted engineers in the design of modified HVAC and industrial fan systems and FRP fans using SolidWorks.

ImprimisRx | Engineering Intern *June – August 2024*
- Rotated through four departments (Warehouse Operations, Filling & Labeling, Facility Maintenance & Engineering, Quality Control & R&D), supporting production equipment maintenance while following safety and quality procedures.

Home Instead | Office and Accounting Assistant *April 2021 – August 2026*
- Processed payroll for a team of caregivers via QuickBooks, ensuring 100% on-time employee compensation.
- Designed marketing flyers, business cards, and promotional videos, improving brand visibility across the local franchise.

Research

Chip Scale Power & Energy VIP | Student Researcher, Georgia Tech *August 2026 – Present*
- Developing chip-scale supercapacitors for miniaturized sensors, energy harvesters, and IoT devices; fabricating carbon nanotube–based electrodes on silicon wafers in a cleanroom and characterizing device performance. U.S.-only team advised by GTRI and sponsored by NASA-JPL, Duracell, and SOCOM.

Projects

HyTech Racing, GT EV Motorsports | Low Voltage Electrical Team *August 2026 – Present*
- Designing the Pedal Box Board in Altium Designer, with signal-conditioning circuits that send throttle and brake sensor data to the vehicle controller; designed 10+ schematic symbols to the team's electrical style guide.
- Designed a USB-C-powered RTML safety-light PCB around a 555 timer; calculated RC values for a ~3 Hz flash and verified the output frequency and duty cycle with an oscilloscope.

Custom Smart LED Strip Controller | ECE 1100 Discovery Project *October 2026 – Present*
- Reverse-engineering a GE Cync smart LED strip controller and designing a microcontroller-based replacement with PWM MOSFET drivers and C++ firmware.

Leadership

Robotics Competition Team 178 | Team Captain, Head of Electrical *August 2022 – June 2026*
- Led a multidisciplinary team to its first World Championship qualification in 17+ years; named All-State and Academic Robotics Student (2026) and Dean's List Semifinalist (2025).
- Wired and troubleshot motor controllers, sensors, a CAN network, and power distribution; wrote a 25-lesson, 50-page electrical training curriculum, increasing women's membership by 70%.

Team Hawks for Hope | Founder and President, LLS Student Chapter *December 2024 – February 2026*

Professional Organizations

RoboJackets Outreach Team, GT IEEE Society, Women in ECE, Society of Women Engineers, Nanotechnology and Photonics Society, Grand Challenges LLC
